- Exempt from earnings limits, therefore, not need to be reported to ORBIT
- Rehired with the expectation of working 30 or more hrs/wk
- Eligible for benefits under ACA
- Eligible to enroll in HDHP

Note:

- The IT0001/contract field will auto-populate based on what ACA status is entered on the PCR during the action.
 - Currently the PCR ACA status options include:
 - ACA Full Time (≥ 30 hours/week) = A1
 - ACA Non-Full Time (< 30 hours/week) = A2
 - ACA Seasonal (to be employed < 6 mos) = A3
 - ACARetSub (> 30 hours/wk) = R2
 - ACARetNoG (> 30 hours/wk) = R3
 - ACARetPri (> 30 hours/wk) = R4
 - Ret Non-NC Govt (< 30 hours/wk) = RO
 - Ret Sub to Lmt (< 30 hours/wk) = RS
 - A1/A2/A3 are used for Regular Temp Employees, NOT rehired retiree temps.
 - RS/R2/RO/R3/R4 are used for Rehired Retiree Temps.
 - Note: RE/R1 are no longer being used.
- The IT0171 benefit program groupings will auto-populate based on the IT0001 contract field.
- The IT0171 program groupings generate profiles on the benefits demographic file that is sent to Benefitfocus/eBenefits. These profiles generate which plans in eBenefits will populate for enrollment.
- Once enrollment is completed in Benefitfocus/eBenefits, the plan will transfer to BEACON into the IT0167 Health Plans record.
- The IT0171 data and IT0167 data is what determines how the 1095c form data is populated for submission to the IRS to show:
 - Eligible employees
 - Offers of coverage provided, and
 - Health Plan enrollments
