NCFS Report - RPT-IN-017

Report Name: RPT-IN-017 NC Print Cycle Count Listing Report

Report Description: NC Print cycle count listing report generates a list of items that will be physically counted in the given warehouse as part of scheduled cycle counting.

Report Data Flow: Warehouse Manager runs the ‘NC Print Cycle Count Listing Report’ and prints it. Warehouse Staff counts and enters the quantities for the items in above report. Warehouse Manager records counted quantities in Oracle system. Warehouse Approver compares the actual physical quantities counted with the on-hand quantities and decides either to approve, recount or reject the cycle count entries.
