

TM-43 CAT2 Comp Balance Check when Recording Adverse Weather Leave

Purpose

The purpose of this job aid is to explain the CAT2 Comp Balance Check and how it will work when adverse weather is recorded.

With the changes to the Adverse Weather policy effective 1/1/2015, an employee is not allowed to use Adverse Weather Leave if the employee has available Comp Leave.

A validation in the CAT2 will prevent a Time Admin from keying Adverse Weather Leave (A/A 9545) in the timesheet if there is an available balance in any of the Comp Leave quotas for the requesting employee. The validation considers current balances and also takes into account any Approved Leave keyed prior to the A/A 9545 entry on the timesheet.

Examples

If an employee has Comp Balances to cover the amount of Adverse Weather leave keyed, the following error will generate, and the entry should be changed to Approved Leave (A/A 9000).

Comp balance(s) available for 80000469. *00000 hours of A/A 9000 should be recorded instead of A/A 9545 (Adverse Weather)

Image

The image shows a 'Display Messages' dialog box with a table containing one row of data. The table has columns for Personnel No., Name, Date, Status, Type, and Error Message. The data row shows Personnel No. 80000469, Name Rita Henry, Date 20, Status with a red circle and infinity symbol, Type E, and Error Message 'Comp balance(s) available for 80000469. *00000 h'.

Personnel No.	Name	Date	Status	Type	Error Message
80000469	Rita Henry	20		E	Comp balance(s) available for 80000469. *00000 h

If an employee has Comp Balances to cover a portion of the Adverse Weather leave keyed, the following error will generate, and the employee should record Approved Leave (A/A 9000) for the amount of Comp Leave remaining and record the remainder of the absence as Adverse Weather leave (if management approves).

Comp balance(s) available for 80000469. *2.00 hours of A/A 9000 should be recorded instead of A/A 9545 (Adverse Weather)

If an employee does not have any Comp Balances, the following warning/informational message will generate. This message is a reminder that the manager must approve the use of Adverse Weather leave based on provisions outlined in the Adverse Weather policy.
