Special Report Considerations/Features

- The report defaults to generating list of all active employees who have a performance rating entered for the year selected.
- The data is refreshed daily, and is current as of the close of business from the previous business day.
- The annual salary on the base report is a variable named “AnnualSalary”. If you remove this variable from the report, and later decide that you need it, you will need to add the variable named “AnnualSalary” (shown with the check mark below). Do not use the measure named “Annual Salary”. If so, the report will return values of #UNAVAILABLE in that column due to filtering.
