EMPLOYEE PAY BY QUARTILE

REPORT DESCRIPTION B0026 | WEB INTELLIGENCE

BOBJ

The purpose of this report description is to describe and explain how to generate the Employee Pay by Quartile report.

REPORT DESCRIPTION

This report provides the employee's pay level within the quartile minimum and maximum of a designated quartile and employee salary average by quartile by Job.

REPORT LOCATION

PA: Compensation

REPORT USES

- This report should be used to monitor employees by their job classification when comparing each by their salary within the quartiles. It can show potential areas of inequity.

- This report also provides a summary count and average salary of employees by quartile.

- Use Compa Ratio Rate to evaluate, either at a summary or detail level, how employee salaries compare to others within their specific job market.

How to generate this report

This report is generated after selecting values for the mandatory prompts. All mandatory prompts must have values selected before the Run Icon can be used to generate the report. Mandatory prompts can be identified as mandatory by the exclamation mark inside of the yellow-orange triangle, the square with the checkmark, or the display of (Mandatory). Detailed instructions for interaction with each prompt can be found at https://www.osc.nc.gov/documents/files/web-intelligence-prompts.

The Mandatory prompts for this report are:

- Organizational Unit
- Calendar Month/Year (Single Value, Mandatory)

This report can also be further limited by utilizing the Optional prompts to further limiting the amount of data that retrieved into the body of the report. Optional prompts are indicated as optional in parentheses beside the prompt.

The Optional prompts are:

- Personnel Area(s) - (Optional)
- Employee Group(s) - (Optional)
- Employee Subgroup(s) - (Optional)
- Job Family(s) - (Optional)
- Job Branch(s) - (Optional)
- Job(s) - (Optional)
- Employee Pay Type(s) - (Optional)
- Employee Pay Area(s) - (Optional)
- Employee(s) PersNo. - (Optional)

NOTE: Since the system has a large number of employees, using broad wildcard searches can be very slow and may result in an error if the search exceeds the system limit. If you do not know the employee number and must do a name search, you can narrow down your search by using the wildcard with specific text strings when looking for an employee by name such as:
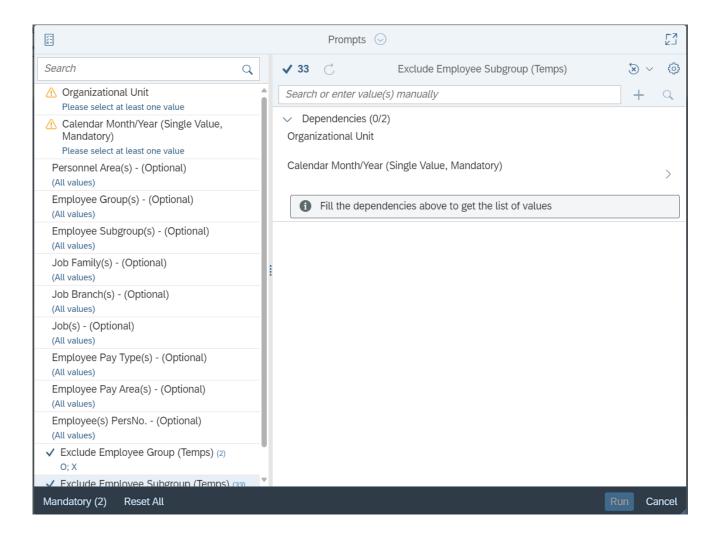

Mickey*Mouse*

*Mouse

If the employee number is known, it is best to use the manual entry field Employee(s) PersNo. - (Optional) to enter your selection.

Exclusion prompts exclude specified data by default while allowing customers the flexibility of changing them when necessary. Exclusion prompts are identified by the term Exclude followed by the prompt.
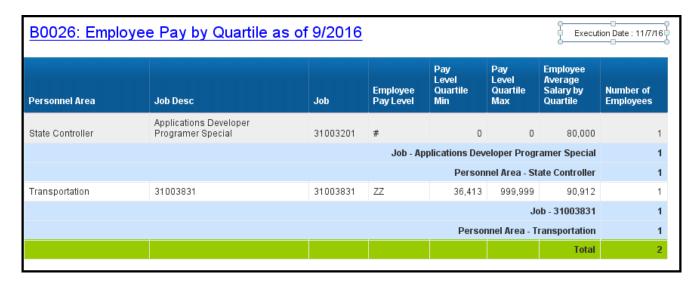

The Exclusion prompts are:

- Exclude Employee Group (Temps)

- Exclude Employee Subgroup (Temps)

NOTE: The Employee Group and the Employee Subgroup exclusions work together as a set to exclude temporary employees. To clear the Temp exclusion, both exclusions (EE Group and EE Subgroup) must be cleared.
