

The purpose of this job aid is to explain how to recover adverse weather owed in the Integrated HR/Payroll System.

Liability Leave hours that have not been made up and expired will result in an error message being generated in Time Evaluation: ZW – "Must Reconcile Liability Leave." Time Evaluation messages can be viewed in transaction PT\_ERLOO.

**NOTE:** The Adverse Weather (A/A type 9545) aging period was updated from 365 days to 90 days in the Adverse Weather policy revision effective 1/1/15. All liabilities incurred prior to 1/1/15 will show the 365-day aging period. For CDE Care Leave (A/A type 9549) per policy, the employee has 730 days to make-up the hours taken.

The employee must use Approved Leave to recover overdue hours. If the employee does not have sufficient Approved Leave to recover all of the liability, the remaining liability should be recovered with LWOP. A Leave Administrator will need to manually trigger the appropriate recovery of the liability.

Two-subtypes for Infotype 2012 have been created effective 7/1/2015 to allow a Leave Admin to recover overdue hours owed. Subtype ZAWR will recover the hours from the Approved Leave quota hierarchy, then LWOP for any remaining liability upon expiration. Subtype ZAWB will recover the hours from the Approved Leave quota hierarchy allowing bonus leave to be used before vacation leave, then LWOP for any remaining liability upon expiration.

# View Messages

Liability Leave hours that have not been made up will result in an error message generated in Time Evaluation: ZW – "Must Reconcile Liability Leave." Time Evaluation messages can be viewed in transaction **PT\_ERLOO**.

The report can be run for specific employees or personnel area.

Review **IT9901** (7000) for records with a start/end date that matches the date of the ZW message. The sum of the values in the 'Hours' column for these records will provide you with the remaining liability hours that the employee owes on the date.

In this example, 7/2/2015 is the date of the ZW message. The sum of the values in the 'Hours' column for these records will provide you with the remaining liability hours that the employee owes for the expiration date of 7/2/2015. This employee had a total of eight hours due on 6/17/2015 and has made up only one hour of the liability. By summing the values in the 'Hours' field, we can determine that the employee has seven hours remaining for the liability balance due 7/2/2015.

# Recovery

The employee must use Approved Leave to recover overdue hours. If the employee does not have sufficient Approved Leave to recover all of the liability, the remaining liability should be recovered with LWOP. A Leave Admin will need to manually trigger the appropriate recovery of the liability via subtype ZAWR or ZAWB.

Two new subtypes for Infotype 2012 have been created effective 7/1/2015 to allow a Leave Admin to recover overdue hours owed. Subtype 'ZAWR' will recover the hours from the Approved Leave quota hierarchy, then LWOP for any remaining liability upon expiration. Subtype 'ZAWB' will recover the hours from the Approved Leave quota hierarchy allowing bonus leave to be used before vacation leave, then LWOP for any remaining liability upon expiration.

1. Enter value **2012** in the Infotype field and press Enter. Selecting **Time Transfer Specifications** from the list of infotypes is another option.

# Review

After successfully completing the Infotype 2012 and allowing Time Evaluation to process overnight, verify adverse weather repayment has processed properly by viewing the messages in transaction PT\_ERLOO, again using variant 'AW.'

If ZAWR is used and there is not enough approved leave quota available in the hierarchy quotas, Time Eval will generate an error message:

L3 – "Cannot recover all Liab Lv with AL "  $\,$ 

L4 – "Liability Lv Recovered with LWOP"

When the recovery is successful for either subtype, Time Eval will generate a message confirming the success:

L1 – Liability Lv Balanced with AL
