

The purpose of this Business Process Procedure is to allow agencies to adjust time worked hours for any employee who recorded too many or not enough hours during conversion. This is a one-time entry only valid on 4/1/2008.

**Trigger:** To adjust the time worked hours for pre-SAP for impacted employees.

## **Business Process Procedure Overview:**

This infotype 2012 subtype ZWDJ has been created to allow agencies to adjust the time worked hours for impacted employees. This record can be a negative value if too many hours were reported, and the number needs to be reduced. The hours of time worked that were already reported on the timesheet in the Integrated HR-Payroll System have been counted, so this 2012 entry is an adjustment to add or reduce the hours. It does not replace the previous count of hours.

To check what was already counted, run transaction code [PT\_BAL00] for Day Balances code 3699 on 3/31/08. Instructions are included here.

For example:

- If 8.5 hours of time worked was not reported, create an IT2012-ZWDJ for 8.50 hours.
- If 3 hours too much time worked was reported, create an IT2012-ZWDJ for -3.00 hours.

## Tips and Tricks:

• This infotype and subtype only work on **4/1/08** - you will not be able to choose this subtype if your date is not 4/1/08.

## Access Transaction:

**Via Menu Path:** SAP menu ==> Human Resources ==> Personnel Management ==> Administration ==> HR Master Data ==> PA30 - Maintain

Via Transaction Code: PA30
