

[Lavesh Chattlani](#) is the President of [Scalene AI Consulting](#) and a leading educator on the ethical, responsible, and practical adoption of artificial intelligence within accounting and finance. He has spent more than a decade in senior leadership roles across the North American fintech and accounting technology landscape, including nine years at Intuit, where he helped build the Canadian Professional Services Division, and most recently as Senior Director for the Canadian Accountant Business Unit at Sage.

Throughout his career, Lavesh has worked directly with thousands of accounting and finance professionals across industry, government, and public practice, guiding organizations through modernization efforts with a focus on security, governance, workflow optimization, and controlled technology adoption. Trained as an Innovation Catalyst by **Scott Cook**, the founder of Intuit, he applies design thinking methodologies to strengthen operational resilience and safeguard data integrity as organizations adopt tools. He holds a Bachelor of Commerce in Entrepreneurship, Innovation, and Finance from Toronto Metropolitan University and has been a featured speaker at major industry conferences including Intuit Connect and Accountex.

Today, through Scalene, Lavesh works with accounting and finance teams to build clear, practical AI strategies that turn technology investments into real operational and financial ROI. His approach focuses on responsible adoption by helping organizations use AI to improve efficiency, reduce risk, and enable new capabilities in an era of rapid technological change.
