
NORTH CAROLINA

INFORMATION TECHNOLOGY EXPENDITURES REPORT

*For the Period
Ended
June 30, 2026*

10/1/2026

TO: THE HONORABLE JOSH STEIN, GOVERNOR
THE HONORABLE PHIL BERGER, SENATE PRESIDENT PRO TEMPORE
THE HONORABLE DESTIN HALL, SPEAKER OF THE HOUSE OF REPRESENTATIVES

FROM: NELS C. ROSELAND, STATE CONTROLLER *Nels C. Roseland*
KRISTIN WALKER, STATE BUDGET DIRECTOR *Kristin Walker*
NATE DENNY, SECRETARY OF NC DEPARTMENT OF INFORMATION TECHNOLOGY AND
STATE CHIEF OF INFORMATION OFFICER *Nate Denny*

SUBJECT: 2026 ANNUAL INFORMATION TECHNOLOGY EXPENDITURES REPORT TRANSMITTAL

CC: CHIEF EXECUTIVE OFFICERS
CHIEF FISCAL OFFICERS
CHIEF INFORMATION OFFICERS
FISCAL RESEARCH DIVISION

To fulfill the reporting requirements of General Statute § 143B-1335, the Office of the State Controller, the North Carolina Department of Information Technology, and the Office of State Budget and Management have prepared the Information Technology Expenditures Report. This annual report covers the period July 2025 through June 2026 and is available through the OSC website at: <https://ncosc.gov/public-information>. Then click on IT Expenditures Report.

Please contact the Office of the State Controller for additional information about this report.

Thank you.

State of North Carolina
Information Technology Expenditures Report
For the Period July 2025 – June 2026

Introduction

The purpose of this report is to provide total information technology (IT) expenditures within the State as required by G.S. § 143B-1335 "Financial Reporting and Accountability for Information Technology Investments and Expenditures." This statute requires an annual report of IT operations and project expenditures coordinated by the Department of Information Technology (DIT) with the Office of State Budget and Management and the Office of the State Controller.

For this report, information technology budgeting and expenditures may include hardware, software, personnel, training, contractual services and other relevant items.

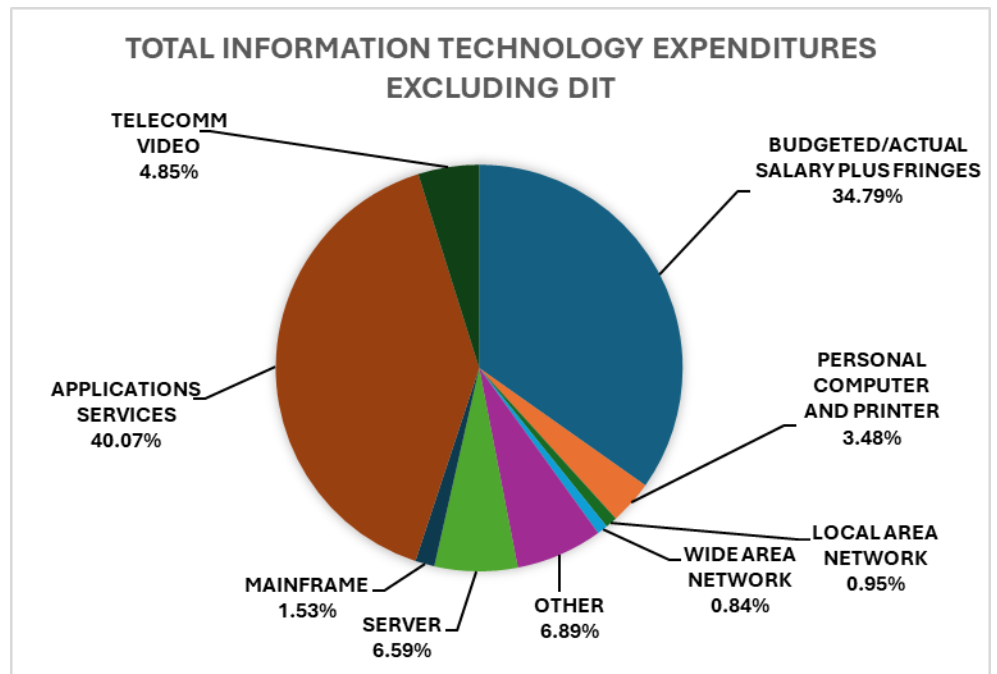

The General Assembly, the Judicial Department, and the UNC System are specifically exempted under G.S. § 143B-1320 from these requirements; however, due to readily available financial data in the North Carolina Financial System, information for the Judicial Department and the UNC System is included in this report to provide a more complete picture of information technology expenditures in the State. Reporting at the project and application level is not available for these exempt agencies since they do not provide this information to DIT for inclusion in the Information Technology Portfolio Management System.

The basis for this report is the statewide chart of accounts and the personnel classification system. The primary sources of this data are the North Carolina Financial System (NCFS), the UNC System Data Mart, the HR-Payroll System, and the Information Technology Portfolio Management System. This report covers the period of July 2025 through June 2026 and includes all funding sources.

Overview of IT

Expenditures

Total IT expenditures (excluding DIT) were \$2,146,482,562 for fiscal year 2026. IT Expenditures for the Department of Information Technology totaled \$504,015,912 during the same period.

State of North Carolina
Information Technology Expenditures Report
For the Period July 2025 – June 2026

As can be seen in this chart, Applications Services contains the largest percentage of IT related expenditures at 40.07% of total IT expenditures.

The next largest categories of expenditures are Budgeted/Actual Salary plus Fringes (34.79%), Other (6.89%), and Server (6.59%). Remaining expenditures are broken down into the additional categories listed on Table 1-1, Information Technology Expenditures.

Report Methodology

Under the NCFS chart of accounts, most information technology operational costs are identified through specific account codes. The primary exception is personnel related costs that are recorded within NCFS in aggregate, without regard to the type of work performed by the position. These costs include salary, fringe benefits, and employee training expenses.

To estimate salary and fringe benefit costs associated with information technology positions, this report utilizes the class code structure within the HR-Payroll System. Budgeted salary for all permanent positions assigned an information technology specific class code is used to estimate each agency's personal services obligation for this fiscal year. The budgeted salary amounts include both vacant and filled positions. Personnel position information for the NC Education Lottery, NC Housing and Finance, and the UNC System are provided by the agencies themselves. If an agency's IT personnel do not fall into the class code structure the salary and fringe benefit costs could be understated.

Employee training costs for IT personnel cannot be compiled or estimated using NCFS, or the HR-Payroll System. These costs are not included in this report.

All other non-personnel costs are grouped into reporting categories as follows:

Category	Description
Personal Computers and Printers	Costs associated with the purchase, lease, and support of personal computers, software, and printers.
Local Area Network	Costs associated with the purchase, lease, and support of hardware and wiring comprising a local area network.
Wide Area Network	Costs associated with equipment and communication lines to provide video and data connectivity services across a large geographical area.
Other	Costs associated with computer related hardware, software, security, authentication and authorization services, or maintenance that has not been otherwise categorized.
Server	Costs associated with the purchase, lease, and support of servers and the software installed on the server.

**State of North Carolina
Information Technology Expenditures Report
For the Period July 2025 – June 2026**

Mainframe	Costs associated with the purchase, lease, and support of a mainframe computer and software. Costs include both purchased and developed software.
Applications Services	External personnel costs associated with development and/or support of applications. This includes analysis, design, integration and implementation support as well as project management services. Also included are software subscriptions, automation services, monitoring services, electronic services, email and calendaring.
Telecommunications/Video Transmission	Costs associated with providing voice and data communications are included as Telecommunications. Video Transmission are costs associated with the transmission of video images, including equipment, support, and North Carolina Information Highway (NCIH) charges. Video conferencing and distance education are primary uses of this technology.

A complete list of accounts used in each category is located on the OSC website at the following link:

<https://www.ncosc.gov/state-agency-resources/chart-accounts/ncfs-chart-accounts>

State of North Carolina
Information Technology Expenditures Report
For the Period July 2025 – June 2026

Summary of IT Expenditures

Table 1-1 Information Technology Expenditures lists by agency, the total IT expenditures grouped into major cost categories. The amounts listed are total costs, without regard to the funding source. Budgeted salary amounts plus calculated fringe benefit cost amounts are used to represent total salary cost, which means that the cost is overstated by the amount of lapsed salaries generated by vacant IT positions. Since the UNC System (except School of Science and Math) now reports actual personnel expenditures, their numbers are not overstated. As a primary IT services vendor for most agencies, the Department of Information Technology is shown separately and is not included in the report totals.

Table 1-2 Information Technology Expenditures – Information Technology Portfolio Management System Detail Cost Categories lists by agency, the total IT expenditures grouped into the detail cost categories used in the Information Technology Portfolio Management System. The amounts listed are total costs, without regard to the funding source. As a primary IT services vendor for most agencies, the Department of Information Technology is shown separately and is not included in the report totals.

Table 1-3 Information Technology Expenditures - UNC System lists the UNC System by the total IT expenditures grouped into major cost categories. Costs are segregated into the same categories as used in Table 1-1.

Table 1-4 Percentage of IT Expenditures to Total Expenditures lists, by agency, the percentage of total IT expenditures compared to total expenditures, without regard to funding source. Intragovernmental transactions are not included in an effort to avoid overstatement of total expenditures across funds.

The 911 Distribution Fund managed by DIT is shown separately since it is not a primary function of the agency. The combination of both categories will equal the DIT total as reported on tables 1-1 and 1-2.

State of North Carolina
Information Technology Expenditures Report
For the Period July 2025 – June 2026

Expenditure Summary by Budget Code Type

While Table 1-1 shows all IT expenditures for the fiscal year, a further analysis can be performed. The expenditures in Table 1-1 (excluding the Department of Information Technology) can be broken down by budget code as follows:

	IT Expenditures	Percentage of Total
General Fund Budget Codes	\$1,583,988,561	73.79%
All Other Budget Codes	\$562,493,911	26.21%
Total of all Budget Codes	\$ 2,146,482,472	100.00%

Greater detail on these numbers is contained in the following schedules:

- Table 2-1 Information Technology Expenditures for General Fund Budget Codes contains IT expenditures, by agency for all Budget Codes contained in the General Fund.
- Table 2-2 Information Technology Expenditures for All Other Budget Codes contains IT expenditures, by agency for all Non-General Fund Budget Codes.

**Table 2-1 Information Technology Expenditures for General Fund Budget Codes

State of North Carolina
Information Technology Expenditures Report
For the Period July 2025 – June 2026

Budget to Actual Comparison and Current vs. Prior Year

Table 3-1 Information Technology Expenditures - Budget to Actual Comparison provides an indication of budget utilization for IT expenditures as of the end of the report period. A 100% utilization rate indicates that the agency spent their entire budget by fiscal year end.

The total budget estimate is calculated using budgeted salary information and the authorized budget amounts as posted within NCFS for the non-salary cost categories.

This table does not include the UNC System, the Department of Transportation, the North Carolina Global TransPark Authority or the North Carolina State Ports Authority. These agencies are allowed to post budgets at a highly summarized level; therefore, none of these budgets can be identified within NCFS as related to IT cost categories.

Table 3-2 Information Technology Expenditures – Current Year versus Prior Year provides a comparison to prior year expenditures.

Table 3-3 Information Technology Expenditures – Current Year versus Prior Year – UNC System provides a comparison to prior year expenditures for the UNC System.

Table 3-1 Information Technology Expenditures - Budget to Actual Comparison

State of North Carolina
Information Technology Expenditures Report
For the Period July 2025 – June 2026

Salary and Fringe Benefit Calculations

For the next two tables, the following columns have information pertaining to:

- **OASDI:** Old Age, Survivors, and Disability Insurance
- **HI:** Medicare's Hospital Insurance
- **Retirement:** ER Retirement rate for TSERS (Teachers' and State Employee's Retirement System)
- **Health Insurance:** ER portion of an individual employee at 12 months

Table 5-1 Salary and Calculated Fringes for All IT Positions lists by agency, the total full-time equivalents (FTEs) for permanent, full-time and part-time IT positions and the current annual budgeted salary amount for these positions as of the end of the report period. Data for these tables comes from the HR-Payroll System and include both vacant and filled IT positions. NC Housing and Finance and the NC Education Lottery provide information for the report that is not available in this system.

Table 5-2 Salary and Calculated Fringes for All IT Positions - UNC System lists the UNC System by the same information described above. This information was provided by UNC (except for School of Science and Math, which comes from the HR-Payroll System). Only the School of Science and Math will have vacant positions since they are reported using budgeted information.

FTE Comparison between IT positions and All Positions

Table 5-5 Information Technology FTEs versus All FTEs compares the FTE count for all IT positions to total FTEs by agency. The FTE count for IT positions is further divided by position status (filled or vacant) as of June 30, 2026. The agencies are grouped by legislative committees for this table. The NC Education Lottery is also included for informational purposes.

State of North Carolina
Information Technology Expenditures Report
For the Period July 2025 – June 2026

Portfolio Management

State government depends on information technology to deliver nearly every public service from processing tax refunds and unemployment claims to supporting law enforcement, public health, and emergency response. Because these systems represent some of the state's largest and most consequential ongoing investments, the General Assembly requires an accounting of what the state owns, what it is building, buying, or maintaining, and what these things cost. This report provides that transparency, giving decision-makers the information needed to manage risk, avoid duplication, and direct technology spending toward the highest public value.

Since 2015, NCDIT's Information Technology Project Portfolio Management System has integrated data from the state's accounting system and DOT's SAP System to collect IT expenditures for each project.

In accordance with the statutory authority of the State Chief Information Officer (SCIO) and the N.C. Department of Information Technology (NCDIT), this section focuses only on the Executive Branch. No figures are provided for the University of North Carolina System, the Administrative Office of the Courts, or the General Assembly.

This report does not include information for the Office of the State Auditor, State Board of Elections, State Bureau of Investigation, and State Highway Patrol, which were recently given exemptions from the statutory authority of the SCIO and NCDIT ([S.L. 2025-83](#), [S.L. 2025-89](#), and [S.L. 2026-41](#)).

What is Portfolio Management?

Portfolio management is the practice of grouping and evaluating an organization's technology investments – projects, existing applications, personnel, hardware, and software – as a single collection rather than in isolation. This section covers projects and existing applications, which are managed as two distinct but related portfolios. Other sections of this report address personnel, hardware, and software costs.

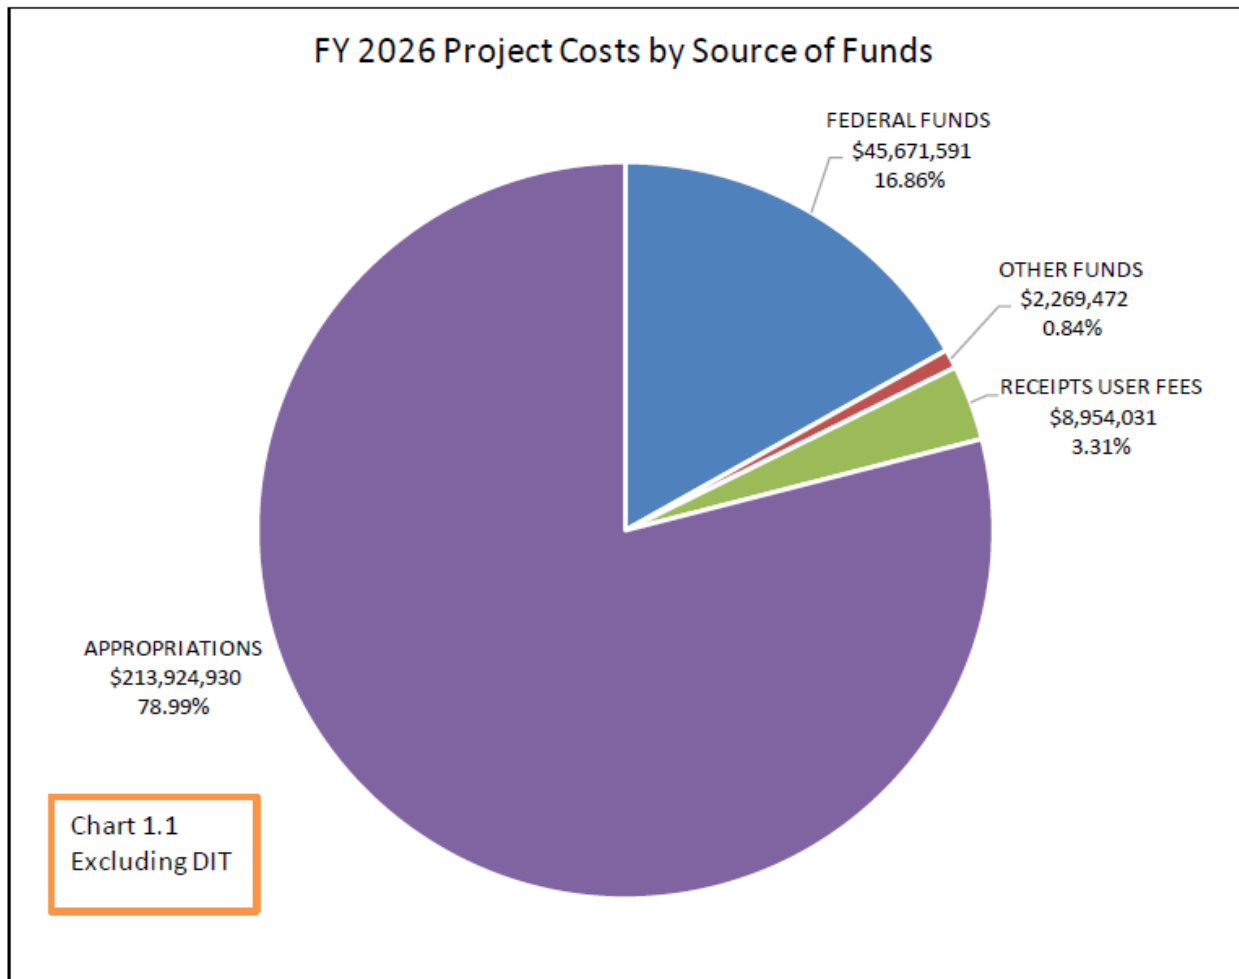

Managing IT as a portfolio lets the state weigh cost, risk, and business value across agency, program, and statewide perspectives to make deliberate decisions about which investments to sustain, modernize, or retire. NCDIT's authority to plan and coordinate these investments derives from [G.S. § 143B-1321\(a\)](#), which charges the Department with establishing a consistent process for planning, maintaining, and acquiring the state's IT resources and requiring agency reports on IT assets, systems, personnel, and projects.

**State of North Carolina
Information Technology Expenditures Report
For the Period July 2025 – June 2026**

Project Portfolio Management

Project Portfolio Management (PPM) focuses on new technology projects intended to improve the delivery of existing services or to provide new services. Projects have a definite timeline, budget, and set of deliverables. When they are completed, the state should have a new service, application, or improved infrastructure for the future.

Chart 1.1 shows FY 2026 project costs by source of funds (excluding NCDIT).

**State of North Carolina
Information Technology Expenditures Report
For the Period July 2025 – June 2026**

Chart 1.2 shows the distribution of project funds statewide at a detailed cost level (excluding NCDIT).

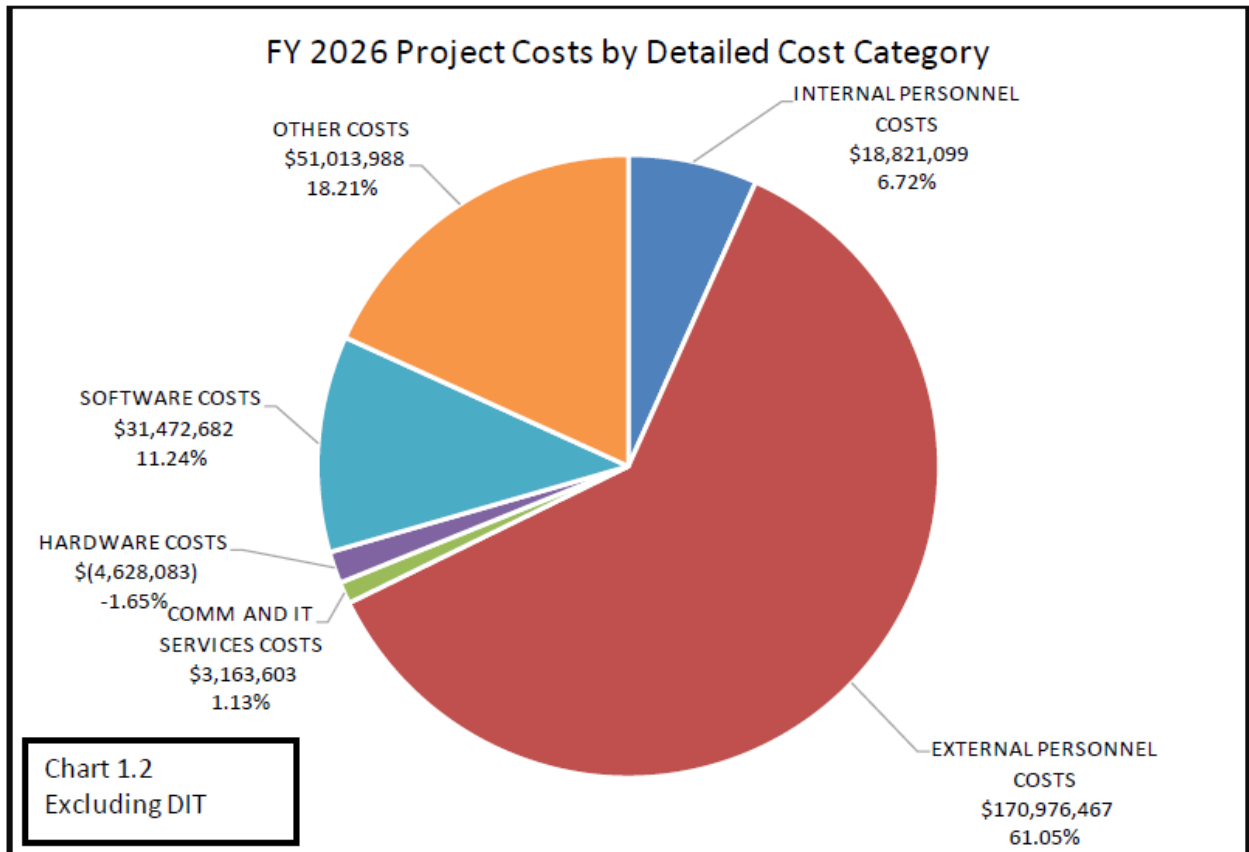

Table 6-1 shows the distribution of costs for projects by agency for 2026 by cost category.

Table 6-2 shows the distribution of costs for projects by agency for 2026 by source of funds.

Table 6-3 shows the distribution of costs for projects by agency for 2026 by cost category in detail.

Table 6-4 shows the distribution of costs for projects by agency for 2026 by source of funds in detail.

State of North Carolina
Information Technology Expenditures Report
For the Period July 2025 – June 2026

Application Portfolio Management

Application Portfolio Management (APM) concerns the existing applications already in operation across state agencies. NCDIT maintains a central inventory of the state's applications along with their business fit, value, and annual operating cost, so the state can determine how its application landscape aligns with business capabilities and strategic priorities, and can identify redundant, aging, or low-value systems. Where PPM asks *"what should we build?"*, APM asks *"what do we already run, what does it cost, and is it still worth running?"*.

The state's central portfolio management approach provides agencies with greater visibility into how applications align with strategic objectives, support the delivery of citizen services, optimize portfolio value, and enable informed, data-driven decisions.

Reporting Methodology

All application cost data submitted to NCDIT is self-reported by agency CIOs and staff. Agencies are encouraged to update other application attributes throughout the year. Application costs are collected annually after the close of each fiscal year, and agency CIOs are responsible for ensuring the accuracy, reliability, completeness, timeliness, and overall usefulness of the information reported.

The cost categories collected were developed with input and approval from the N.C. Office of the State Controller and the N.C. Office of State Budget and Management and align with the chart of accounts in the North Carolina Financial System.

NCDIT encourages agencies to review their internal reporting practices to ensure alignment with statutorily mandated reporting requirements. Questions regarding the data presented in this section of the report should be directed to the reporting agency and independently verified.

Availability of Data

NCDIT provides agency-reported information in accordance with state statutes and as part of its ongoing commitment to transparency in government services and spending. Since 2019, NCDIT has published real-time agency application cost data on its public website through interactive dashboards, available at <https://it.nc.gov/resources/nc-it-application-portfolio>. These dashboards provide users with increased access to information and allow for more comprehensive interactive analyses, including multi-year trend reviews, agency-specific filtering, and detailed application-level searches. Please note that the figures included in this report reflect a single point in time, and the dashboard itself is live and frequently updated.
